

Easy road crossings for skiers

NORDIC SLIDER

INNOVATION
FOR XC-TRACKS
AND SLOPES

You can
leave your
skis on!

Add value to your ski resort!

Uninterrupted sports and fun for everyone –
from beginners to professionals!

NORDIC
SLIDER

NORDIC SLIDER

ENSURE YOUR COMPETITIVE ADVANTAGE NOW:

NORDIC SLIDER is a patented system. It enables skiers to cross gritted or snow-free roads without damage to the skis. Comfortable, quick and no more taking of skis! Especially designed for:

Slopes NSX – Nordic Slider Cross Country
Alpine Skis NSA – Nordic Slider Alpine
Snowboards NSB – Nordic Slider Board

NORDIC SLIDER guarantees uninterrupted use of the whole trail net of your skiing area. The system provides the perfect link in your high-quality resort.

And your guests will be more willing to pay trail fees. **NORDIC SLIDER** promises maximum comfort in road crossing – independent of external factors such as weather conditions.

INDIVIDUAL COUNSELLING

We gladly adjust our services to your individual needs!
Clear and simple building instructions ensure
best mounting process. We gladly provide
more detailed information.

NORDIC
SLIDER

Missing Link in track networks!

ALL ADVANTAGES AT A GLANCE:

NORDIC SLIDER
NO MORE OBSTACLES:
no heightening,
same level as
XC-track or slope

Cover plates
for summer

... simple,
permanent,
safe!

FOR YOUR GUESTS

Sliding-surface-friendly: for skating-, wax- and crown-pattern skis, suitable for klistert keep in motion: double-pole push, classic walking or running movements
No more tiresome putting on and off skis: this enables better time-measurement for professional skiers. Less agile people need not bend unnecessarily and handle complicated binding systems easily affected by dirt and snow.
Safe and comfortable use: Simply follow the track, width and gliding characteristics remain at NSX, piste-related gliding characteristics at NSA.
Attractive appearance through colored rolls and galvanized cast-iron
Comfortable and easy, no training phase necessary

MANAGEMENT

NSX - NORDIC SLIDER CROSS COUNTRY

Full-value alternative for bridge constructions and underpasses
Highly accepted by athletes because they can keep in motion
Easily mounted: no special tools, independent of direction, mix ups impossible
Fits into the landscape: same level as other surface, inconspicuous
Flexible reaction to topography or obstructions caused by unwilling proprietors.
Missing link in trail network: Village connecting trails become more attractive.
Reasonable price, no maintenance costs
Place-saving and universally applicable
Easy mounting of connections with snow-catapults

LIFT COMPANIES

NSA - NORDIC SLIDER ALPINE

Full-value alternative for bridge constructions and underpasses
Added value to ski tracks and linking slopes
Crossing of slope-dividing roads
Larger version for carving skis applicable
Link to parking spaces - directly from the car to ski trail
Flexible slope planning
Highly accepted by athletes
Easily mounted: no special tools, independent of direction, mix ups impossible

STREET MAINTENANCE

Simple build-in: like usual drainage systems with local building companies
Little depth and width: No interference with existing cables or pipes, new cables can easily be laid underneath NORDIC SLIDER
Cast iron, galvanized
Tested and approved according to EN 1433 = 40 t weight endurance per element
Fully adequate drainage, easily enlargeable
Resistant against thawing salt and grit
No obstacle to snow-clearers, street-sweeping devices and mowers

LAND OWNERS

No loss of property
Can be crossed by cattle and horse-drawn sleighs
Flush with surface, no obstacle for agricultural machines
Fully adequate drainage system

TOURISM

Direct link between tracks and gastronomy, thus compensating possible disadvantages resulting from location
Additional marketing advantages
Better use of existing structures
Extension of season

NORDIC SLIDER FACTS:

TECHNICAL DETAILS

- Independent of direction:**
- One multi-purpose element
 - Building mistakes can be excluded
- Modular structure:**
- 50 cm frame, adaptable to all building situations
 - stackable
 - tested and approved according to EN 1433
- Especially coated stainless rolling elements:**
- Suitable for klisters, elastic coating independent of heat and cold, chemically and mechanically resistant
 - Simple exchange of individual rolls
 - Optimum fitting guarantees steady rolling
 - Permanent coating with a certain tolerance against damages
- Stepless adjustable rolls:**
- until 25% gradient of the road
- Situation in summer:**
- Standard cover plates enable simple preparation of summer configuration

BUILDING

- Within one day:**
- Remove the street surface – dig – lay the foundation on gravel – build in the gutter with additional drainage devices – lateral concrete support – street surfacing
- Traditional system parts:**
- Building can be done by local construction firms, street maintenance or community building division
- Situation in summer:**
- cover plates for summer are included

FUNCTION

- Preparation:**
- After snowfalls just use normal snow clearing devices or snow-caterpillars
 - integrated ramps guarantee a sufficient amount of snow until the next preparation-run
- Connection to the tracks:**
- Flush with street surface
